

# 100 Year Bauhaus Pavillion

## Stress Lines

---

Better accoustic  
performance  
Increased (natural)  
lighting

Least amount of material  
Optimal thickness

## Inner Surface

---

Main branches are  
stresslines

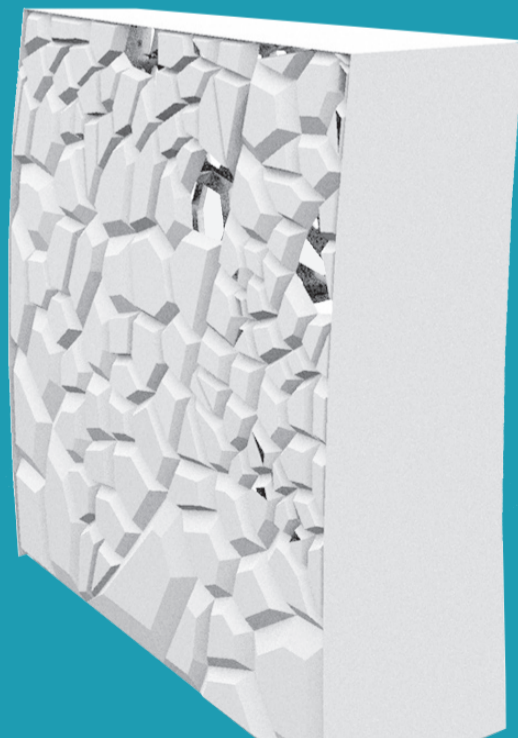

Other cells gradiently  
diffuse sound

## Outer Surface

---

Main branches are  
watergutters  
Same pattern is shown  
outside

MSc 2 Group 02
